Rene Pair — Website Design Brief

A Figma Make prompt document · attach or paste into Figma AI

How to use this document

This is **not** a file to place on the canvas with File > Import — that only drops it in as a flat, non-editable picture. To actually generate a design from it, use **Figma Make** (press **Ctrl/Cmd + K** in Figma, or click the Make icon in the toolbar).

1. Open Figma and start a new Figma Make prompt (Ctrl/Cmd + K → "Make", or the Actions button).

2. Attach this PDF to the prompt as a reference file, and also paste the boxed prompt text below into the prompt box itself — attaching alone may get skimmed, so the pasted text guarantees it's read in full.

3. Let it generate a first draft, then refine section by section with follow-up prompts (e.g. "make the hero taller" or "increase spacing between service cards").

4. Everything it generates is fully editable afterward — treat the first draft as a strong starting point, not a final layout.

Copy-paste prompt

Paste everything inside the dark box below directly into Figma Make.

Design a responsive homepage for **Rene Pair**, a local auto repair shop. Tagline: *"Every car deserves a fair repair."*
Brand personality: bold, honest, motorsport-inspired. Confident and energetic, but trustworthy — not flashy, not cheap-looking.
Color palette (use exactly):
• Asphalt black #1E1F22 — primary background (header, hero, footer)
• Asphalt gray #2A2C30 — secondary dark surface
• Racing yellow #FFC800 — primary accent: buttons, links, icons, highlights (this color should dominate the accenting)
• Yellow hover #E6B400
• Red #E63328 — used sparingly, as exactly one deliberate accent (a small logo mark and one badge), never a full button system
• Steel gray #9CA3AF — secondary text on dark backgrounds
• Light concrete #F2F1ED — light section backgrounds instead of stark white
Typography: Headings in Oswald, bold, condensed, uppercase. Body text in Inter, regular weight.
Signature motif: a checkered-flag pattern (alternating asphalt-black and yellow squares, 45-degree diagonal) used as a thin divider strip between major sections. This is the site's

signature detail — do not replace it with a plain line or generic divider.

Sections, in this order:

1. **Header** — logo mark "RENE PAIR" with a small red accent on the icon only, horizontal nav (Home, About Us, Services, Gallery, Contact), yellow "Book a Repair" button on the right.
2. **Hero** — dark asphalt background, small yellow eyebrow label "TRUSTED LOCAL AUTO REPAIR", large bold headline "Every car deserves a fair repair.", one supporting sentence, two buttons (yellow filled primary "Book a Repair", white outlined secondary "See Our Services").
3. **Trust bar** — dark strip beneath the hero with 4 short trust points, each with a small yellow icon: Certified technicians · Most repairs same-day · Upfront, honest pricing · Genuine parts only.

[checkered-flag divider]

4. **Services** — light background, heading "Our Services". 6 cards in a grid: 3 columns on desktop, 2 on tablet, 1 on mobile. Cards: Oil & Filter Change (PHP 800), Brake Service (PHP 2,500), Tires & Alignment (PHP 1,200), Diagnostics (PHP 600), Transmission (PHP 3,000), AC Repair (PHP 1,500). Each card has an icon, name, one-sentence description, and a yellow price-tag pill showing the starting price. Add a small red "Most Booked" ribbon badge to the Brake Service card only — this is the only additional red element on the page.

[checkered-flag divider]

5. **How It Works** — dark background, 4-step horizontal process with numbered yellow circles: Book Online, We Diagnose, You Approve, Drive Away. Each step gets a short one-line description.
6. **Testimonial** — light background, one centered pull-quote from a customer, attributed by first name and last initial.

[checkered-flag divider]

7. **Footer** — dark background, 3 columns: brand blurb, visit-us address and hours, contact email and phone. Footer links turn yellow on hover.

Contact details to use: 124 Auto Row, Angeles City, Pampanga • Mon–Sat, 8am–6pm • hello@renepair.ph • +63 912 345 6789.

Responsive behavior: Design for Desktop (1200px+, 3-column service grid), Tablet (768px, 2-column grid, tighter nav spacing), and Mobile (375px, everything single-column, nav collapses to a menu).

Reference inspiration: the general energy of Rapide Auto Service Experts (rapide.ph) — bold automotive service branding with a dominant yellow accent on dark backgrounds. Do not copy their layout, logo, or wordmark directly; this is an original, distinct brand.

Tip: if Figma Make drifts from the brief on the first pass, don't start over — reply with a targeted follow-up prompt naming just the one thing to fix (e.g. "make the checkered divider thinner" or "the hero text is too small"). Small corrective prompts work better than one giant re-prompt.
